RELEASE

LIFEGARD® AQUA STEP® PRO

Lifeguard Aquatics has introduced the AQUA STEP® PRO...the next generation of its Internal Step Design Ultraviolet Sterilizer. New and improved features include... all replaceable parts with water tight seals top and bottom. This insures ease of bulb and main body housing replacement. In addition, Lifeguard technology offers hang or stand aquarium installation, pure high quality quartz bulb material for maximum UV transmission, spring loaded top clamp and bottom adjustment screws, oxygen creating waterfall and higher capacity than any other comparable size UV, creating more volume area for increased contact time. Available in 2 sizes...15 watt for up to 120 gallon aquarium and 25 watt for up to 200 gallon aquarium. The AQUA STEP® PRO is also used with Pond or Water Garden filters or inside pond skimmers to kill free floating algae.
