Aquarium/Fountain Pumps

Model 200 and 400 INSTRUCTIONS

Magnetically powered centrifugal pump featuring a watertight synchronous motor. Requires a small but important maintenance procedure for correct functioning. Every 1-2 months remove bottom **C**, sponge **B** and rotor **A** and then wash all parts with water.

SAFETY STANDARDS

- ◆ Make sure that the cables are fully intact before connecting the equipment to the main power supply.
- ◆ The power cables can not be replaced or repaired. Replace the entire unit if damaged.
- ◆ **WARNING:** make sure that the pump is disconnected (unplugged) before performing any maintenance in the water. If the plug or main socket is wet, disconnect the master switch before removing the power cable.
- ◆ It is vital that the product is plugged into a GFCI outlet switch (Ground Fault Circuit Interrupter).
- ◆ Do not use the equipment for purposes other than what it is intended for.
- ◆ Ideally, extension cords should not be used. If it is necessary to use one, make sure that the connection is completely sealed and that the cable is suitable for external use and identical to that of the apparatus (in terms of insulation and section).
- ◆ Make a Drip-Loop in the cable below the level of the plug to avoid that accidental drops of water coming into contact with the plug and socket (**see 1**).
- ◆ Avoid lifting the equipment by means of the power cable during installation and maintenance operations.
- ◆ The product can be used in liquids with temperatures no greater than 95°F.
- ◆ Keep these instructions in a safe place for future reference.
- ◆ Keep out of reach of children.

SUBMERSIBLE PUMP
